

Instructions

This one template can be used to create two different looks for your stenciled letters. You'll need a razor blade, a surface to cut on and a ruler.

Solid Letter

Print the template once, cut out the black area of the letter and paint the stencil.

Outlined Letter

Print the template twice, cut out the gray outline from the first print-out, paint the stencil and allow to dry. Cut out the black area of the second print-out, place it over the previously painted letter and paint. Be sure to use a thick coat of paint on the black stencil so the underlying color does not show through.
